CCHROMATRON 5F Intentional Color Harmonizer Instructions: THIS INSTRUMENT HELPS YOU TO DEFINE, ENERGIZE AND HOLD YOUR INTENT. In a nutshell: Using a pendulum, you dowse to find the harmony level of a subtle energy problem from a symbol of a person. If low, you then dowse for the appropriate color energy to raise the harmony. Next, you dowse to determine the length of time to leave the instrument set up to "broadcast" harmonizing influences to improve the subtle energy condition. Afterward, you go back and re-dowse the harmony level to see how successful you were.

- 1) Obtain whatever permission you need to go ahead.
- 2) Obtain a two small objects, such as a beads or beans, to be used as a markers. Place one marker at "0" of the HARMONY LEVEL % scale.
- 3) Place a "witness" of the person with a subtle energy problem in the WITNESS CELL. The witness may be anything intimately associated with the person, such as a sample of hair, a photograph, a drop of saliva or blood or their written name on a piece of paper, etc.
- 4) In your mind, define the subtle energy problem that you want to fix. For example, you may want to consider Uncle Harry's problem of loosing his eyeglasses. Write a short statement of the *results* that you desire on a small piece of paper and add it to the WITNESS CELL. For Uncle Harry's situation you may want to write something like: *Uncle Harry finds his glasses easily.*
- 5) Intend to find the harmony level of Uncle Harry's problem by slowly moving the marker along the HARMONY LEVEL % scale as you hold a pendulum over the DOWSE HERE spiral. When you get a "yes" response from the pendulum, stop and record the harmony level reading at the marker's setting. If the reading is below 50%, you may wish to go on and use this instrument to increase the harmony level.
- 6) Now intend to find the appropriate color vibration to correct the subtle energy disharmony. Place the second marker at the far left (red) end of the COLOR BAR and slowly move the marker along the bar until you get a "yes" response from your pendulum over the DOWSE HERE spiral. Leave the marker set to the position on the COLOR BAR that gave the pendulum response. From your dowsing, this is the color that can help the energy disharmony condition. At this point, you can simply tell the person wear or carry something of the selected color for a time that you can dowse to determine. Or you can go on to step 7 to use this instrument to "broadcast" the color energy from a distance.
- 7) Energize the instrument by placing a power object in the POWER (CANDLE) CELL. A favorite crystal or our Chi Energy jewelry will work well. A lit candle in a glass candle cup is especially powerful.
- 8) Determine how long to send harmonizing energy of the selected color. Reset the first marker at the "0" end of the TIME TO HARMONIZE scale. Slowly move it along until you get a "yes" response from your pendulum over the DOWSE HERE spiral. This reading represents the time in minutes required to establish harmony. You may wish to set a timer to this value. Leave the markers in place on the instrument for the duration of the specified time.
- 9) When the time runs out, check the HARMONY LEVEL % again to see if the condition has improved or if further harmonizing in needed. Finally, empty the WITNESS CELL, remove the markers, blow out the candle or remove the power objects from the POWER CELL.

NOTE: This instrument will self-clear residual energies. If you feel you need to do further clearing, pass a small magnet over the instrument.
